

 Rohit Srivastava

Linux System Administrator

 NOIDA |  +91 7408555511 |  [srivastavarohit2108@gmail.com](mailto:srivastavarohit2108@gmail.com)

---

## □ PROFESSIONAL SUMMARY

Result-driven and highly skilled **Linux System Administrator** with over **5 years of experience** in IT infrastructure, system administration, and data Centre operations. Strong background in **application migration, production support, incident management, and ITIL-based service delivery**. Proven expertise in handling **virtualization (VMware), server provisioning, and root cause analysis (RCA)**.

---

## □ TECHNICAL SKILLS

- **Operating Systems:** Linux (RHEL 6/7/8)
  - **Virtualization:** VMware Esxi 6.5, 7.0.2, 7.0.3, KVM, Hyper -V
  - **Storage Management:** LVM, NFS, Disk/Volume Management
  - **Tools & Processes:** ITIL, Service Now, NetBackup, MFSA ( Server Automation ),
  - **Other Skills:** OS Hardening, Patch Management, Monitoring & Alerts
  - **Cloud Services :** Docker & Kubernetes
- 

## PROFESSIONAL EXPERIENCE

**System Administrator – (AT&T American Multinational Telecom -**  
<https://www.att.com/>)

**DXC TECHNOLOGY | NOIDA | JULY 2023 – Till Date**

- Clearing backlog tickets and responding to escalation by user.
- Driving P2 and P1 incident calls and providing the solution to the customer on call.
- Working on various HP-UX and Linux OS related issues and also troubleshooting the same.
- Identifying Filesystem, Disk, VG, LVM, NFS and backup related issues in server and providing solution for the same.
- Working on various patching related issues and server OS upgrades.
- Installing new SW's and building new environments as per the requirements.
- Debugging user access related issue and application cluster, node issues.
- Performing server pre checks and post check during the patching.
- Working on server booting issues and mount point related issues.
- Implement monitoring solutions to track infrastructure performance, health, and security, and set up alerting systems to respond to issues in real-time.
- Installing the **Docker** application and running the **containers**, stopping them, and checking the status.
- Finding RCA for a major incident and making plan to reduce the backlog tickets.
- Creating virtual servers on **Hyper -V** and **KVM** platforms and resolving any issue that arise.

**QUESS CORP LIMITED. | NEW DELHI | AUG 2021 – JUL 2023**

- Installation, Configuration, Administration and Upgrade of Redhat Linux 6.x, 7.x, 8.x operating systems.
- Implemented and administered VMware ESX 6.5, 7.0.2, 7.0.3, 4.x for running the Redhat Linux servers on development and test servers and working on network configuration and troubleshooting.
- Configured volume groups and logical volumes, extended logical volumes for file system growth needs using Logical Volume Manager (LVM) commands and working on permission and ownership related issues.
- Experience in Setting up and configuring Install Server, Configuration Server and Checking & Initiating Backups, User Administration, Performance check.
- Configuring distributed file systems and Hardware error troubleshooting and vendor coordination.
- Troubleshooting on password related issues, user account issues, NetBackup issues and vulnerability related issues.
- Configured various services, devices as well as applications of UNIX servers and worked with the application team to customize the environment, working on CPU, Memory, and load average issues file and directory related issues.
- Installation, Configuration, Administration and Upgrade of Redhat Linux 6.x, 7.x, 8.x Operating systems.
