## TECHNICAL SKILLS

**Automation Tools:** Qatts , JMeter, Postman, Selenium

**Tools & Languages:** C, C++, Java, Java script

**Database:** SQL Server, MYSQL, Oracle

**Test Management:** JIRA, Radar

**Testing:** Automation, Functional, Performance, Database and API Testing

**Domains:** Insurance, Immigration, Healthcare and Apple marcom pages

## PROFESSIONAL SUMMARY

- Software Test Engineer having **3 years** of experience in **Software Testing**, Test automation development and testing web applications.
- Well-versed with both **Functional** and **Automation testing** processes.
- Expertise in **Auto Insurance** for US and European Schemes and Asia countries and Global Immigration for US.
- Having Good knowledge in **API Testing**.
- Experience in developing **Test Scenarios, Test Cases**.
- Well acquainted with **Software Development Life Cycle** (SDLC) and **Software Testing Life Cycle** (STLC) and good understanding of **Agile Methodology**.
- Work experience on Functionality Testing, GUI Testing, Regression Testing, Integration Testing, System Testing, User Acceptance Testing, Exploratory testing, Black Box Testing, Ad-Hoc and End to End testing.
- Good knowledge in working with Qatts Automation Tool.
- Excellent communication and interpersonal skills backed up by sound professional ability to work independently as well as a team member.
- Expertise in designing the test cases, analyzing the bugs and interacting with development team in fixing the defects.
- Good knowledge in insurance domain.
- Experience in using Bug Management Tool Jira and Radar tool.
- Working on functional, compatibility, exploratory and regression testing on the latest update of the Marcom application.

## EDUCATIONAL QUALIFICATIONS

- ❖ **M.SC** in Electronic Science from Acharya Nagarjuna University, Guntur.
- ❖ **B.Sc.** in Electronic Science from Acharya Nagarjuna University, Guntur.

## PROFESSIONAL DETAILS

- ❖ Worked as **Software Test Engineer** in **IBASEIT** from Sep 2021 to August 2024.
- ❖ Working as **Quality Assurance Analyst – Contract** at **Hogarth Worldwide** from Aug 2025 to present.

## PROJECT DETAILS

### Project #1: **Apple marcom pages**

Period : Aug 2025 – present

Client	APPLE (Via Hogarth)
Operating System	Safari
Database	MySql
Programming Languages	Java2.0, Servlets, JSP2.0, JavaScript1.0.Liferay 6.1
Web Browser	Sequoia18.6
Bug Tracking Tool	Radar

The latest update of the Marcom application introduces new features, performance improvements, bug fixes, and UI enhancements. Functional, compatibility, and usability testing were conducted to validate the stability and user experience of the updated version. Additionally, existing bugs were verified, and any new issues identified during testing were reported using the RADAR tool.

### Project #2: **DANNI**

Period : Dec 2022 – August 2024

Client	QBE
Operating System	Windows 7/10
Database	MySql
Programming Languages	Java2.0, Servlets, JSP2.0, JavaScript1.0.Liferay 6.1
Web Browser	IE 9.0 or higher and Chrome
Bug Tracking Tool	JIRA

QBE is one of the largest reinsurance companies of the world. Danni is an Application for MBI of Vehicle (Auto insurance), System allows dealers to input mechanical breakdown insurance policies and claims. User will be able to select from different range of products available to choose (like Warranty, GAP, Rapid repair, Smart, Recovery, and Mot). Various flavors of this application are deployed across 13 countries for 30 Clients. In Danni System dealers sells the policies along with cars and claims are handled directly by QBE.

## Roles and Responsibilities:

Reviewed Business Requirement and Software Specification Requirements to achieve better understanding of the Application.

- Developed Test Scenarios and Test Procedures based on the test requirements.
- Created Test Cases manually for Functional testing based on the Functional area documents.
- Prepared automated scripts for Maintenance and Regression testing.
- Actively involved in preparing of Test Data for Framework.
- Created Test cases Using Element locators and Selenium Webdriver methods.
- Conducting Data driven testing, cross browser testing and parallel test execution.
- Involved in the Quality of the System being developed by giving feedback to the Developers on bug fixes and modifications required.
- Experience in Pen testing using Burp Suite.
- Performed compatibility testing on various browsers and operating systems to ensure excellent user Acceptance testing.
- Involved in AAD integration testing.

Project #3: Envoy

Period

: Sep 2021 – Nov 2022

Client	Envoy Global
Operating System	Windows 7/10
Database	MySQL
Programming Languages	Java2.0, Servlets, JSP2.0, JavaScript1.0.Liferay 6.1
Web Browser	IE 9.0 or higher and Chrome
Bug Tracking Tool	JIRA

## Client Overview

Envoy is a global immigration services provider which sponsoring and managing work visas in the U.S. and overseas results in the easiest application experience for you and employees and offering both inbound and outbound immigration and proprietary technology.

## Highlights:

- Received excellent feed backs and appreciations from higher level Management.
- Received numerous 'On-The-Spot' award from higher level Management.
- **ISTQB** Certified Tester.

## Roles and Responsibilities:

- Prepare and execute test scripts using Selenium.
- Located web elements using Xpath expressions, CSS Selectors etc.
- Performed parameterization of elements.
- Working with a team of developers to produce quality releases
- Monitoring testing activities to ensure quality & functionality of systems; ensuring timely and accurate test communication with Development Team and client throughout the product delivery
- Involved in Smoke Testing, Functional Testing, Regression Testing.
- Involved in API testing and parameterizing the values of request body as well as the response body and writing schema and executed them.
