PROFILE

To work with an organization, that provides the right mixture of challenges and opportunities for attaining the individual goals and the goals of the Organization.

Ready to explore and experience all the opportunities that come.

WORK EXPERIENCE

System Engineer - Windchill Developer

Tata Consultancy Services

Feb 2023 - Present

Project: Scarab to PDM Data Migration

- Data Loading Activities via Loader Template.
- Data Loading via Windchill Bulk Migrator.
- Developed scripts in Python and PHP for data filtering utilities.

Project: Matrix to PDM Data Migration

- Working on WBMFF CAD Metadata Extractor for migration of CAD Data.
- Developed scripts in Python for data filtering utilities and data reports.
- Working on Windchill Bulk Migrator (WBM) for non-Windchill to Windchill data migration projects, including installation and configuration of WBM in client environments.
- Creating and managing WBM mapping files and transformation configurations for migrating parts, documents, and metadata into Windchill.
- Performing data validation and pre-load checks to ensure data integrity and compliance with client-specific PDM/PLM standards. Collaborating with the client team to define mandatory attributes like object numbers, classifications, revisions, and relationships for successful object creation in Windchill.
- Expanded expertise in advanced WBM features including error handling, logging, and load performance.

Programmer Analyst

Cognizant Technology Solutions

Nov 2020 - Jan 2023

Project: Process Testing (DTAG)

- Automation Script Maintenance, Participating in PI Planning, and Smoke Test Execution are the primary roles in my profile.
- Scripts are developed using languages such as Java, Selenium, VBScript.
- Awarded as Best Performer in the team within a year.
- Conducted Alumni connects for new trainees.
