PROFESSIONAL SUMMARY

Backend-focused engineering student with practical experience shipping Python and SQL features in internship and lab p
Strong on API design, data modeling, and test-driven delivery in fast iteration environments.

SKILLS

Languages: Python, SQL, JavaScript
Backend: FastAPI, REST API design, Auth flows, validation
Data: PostgreSQL, query optimization, relational schema design
Tools: Git, Docker basics, Postman, Linux CLI
Frontend familiarity: React basics, TypeScript basics

EXPERIENCE

Software Engineering Intern | ABC Tech Solutions | Jun 2024 - Aug 2024
Total Experience: 1 year
- Implemented 8 FastAPI endpoints for recruiter analytics and status workflows.
- Reduced average API response latency by 20 percent through SQL query cleanup and index use.
- Added server-side validation and error handling across candidate score aggregation pipelines.
- Collaborated with QA to define test cases for edge conditions in submission scoring.

PROJECTS

AeroHire Platform (Hackathon Build)
- Worked on recruiter decision flow, evidence-driven audit display, and integrity timeline clarity.
- Built baseline checklist rules for role-fit scoring and mismatch highlighting.
- Added transparent recommendation support with traceable evidence mapping.

EDUCATION

B.Tech, Computer Science and Engineering | SRM Institute of Science and Technology | 2021 - 2025
